Forecast for Wednesday 04 Aug 2021

Weather: Dry and fine initially but conditions will become changeable from late morning as scattered and locally sharp showers develop, some of which are likely to turn thundery. Some places will escape these however and the evening will become increasingly dry.

Chance of cloud free mountain/hill tops above 600m: 90% falling 70% as showers develop.

Visibility: Very good until late morning after which visibility will become very variable as showers develop. These will bring areas of cloud down to 500m along with briefly torrential rain, obscuring neighbouring slopes from view.

Meteorologist's View

Be aware of fast changing conditions as heavy showers or thunderstorms develop. Thunderstorms will bring a real risk of lightning strikes as well as hail and briefly very poor visibility.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
02:00 on Tue 03 Aug 2021	0mm	1.8mm	6.4mm

Forecast for Thursday 05 Aug 2021

Weather: Increasingly cloudy but dry and bright until mid-morning, after which bands of heavy rain will spread east across all areas along with strengthening south or southeast winds. Cloud descending widely across the hills through evening with further rain or heavy showers never far away.

Maximum wind: South or southeast 15-20mph, gusting up to 30mph on summits.

Chance of cloud free mountain/hill tops above 600m: 80% falling 30% through afternoon.

Visibility: Generally very good at first with cloud well above the hills, but becoming more variable from mid-morning as outbreaks of rain come and go. Periods of cloud will accompany these down to around 5000m before becoming more extensive down to 300m through evening.

Temperature: **Valleys:** Plus 12 Celsius rising Plus 18 Celsius.
At 600m: Plus 12 Celsius.
Freezing level: Well above summits.
